WINTER SPECIALS

Winter is the time we put up our aircraft and wait for warmer times. Come in this winter and get your ADSB upgrade while the schedule is flexible. Call Dawayne Wilcox for a quote today!

Avionics Exchange has several options for ADSB compliance. ADSB transponders with or without built in WAAS GPS

STRATUS ADSB TRANSPONDER

Available with or without built-in WAAS GPS. Single engine aircraft pricing.

\$3,495 installed Without GPS

\$4,000 installed With GPS

APPAREO

LYNX NGT-9000

Mode S/ES touchscreen transponder and moving map displays ADS-B traffic, weather, dedicated winds and temps aloft. Quickly access METAR/TAFS and NOTAMS at frequented airports. The Lynx NGT-9000 has dual ADS-B In capabilities, 1090 and 978, which allows you to see ADS-B equipped aircraft outside of ADS-B coverage.

EVOLUTION E5 FLIGHT DISPLAY

Glass with attitude and more for under \$5,000. Don't settle for a limited digital replica of your existing mechanical gauges. Harness the true power of a feature-rich glass cockpit system and upgrade your flying experience. Simplifying the transition from old-style vacuum gauges to electronic displays, the Evolution E5 is a drop-in replacement that gives you advanced functionality with easy and affordable upgrades that allow you to add additional capabilities and take advantage of future technologies without replacing your existing display.

Without ACU: \$4,875 plus installation.

With ACU: \$5,844 plus installation.

ACU required on most autopilot installations.
