Spring and Summer Airport Operations

With more hospitable flying weather on the horizon, we'd like to take this opportunity to pass on some important information regarding our operations for the upcoming spring/summer season.

Mowing Operations - Soon, our mowers will be out in full force. Equipment used within close proximity to the aircraft operating area will be equipped with an obstruction flag and/or beacon light. Our equipment operators constantly scan for traffic and will keep clear to prevent a disruption to operations. Please keep an eye out for them.

Thunderstorms - In the event lightning is present within a five-mile radius of the airport, we will cease ground operations until the threat has cleared. This upholds our commitment to safe operations and is meant to protect personnel and equipment. We appreciate your cooperation.

-MONTHLY TRIVIA CONTEST- 50/50 CHALLENGE

**"Earn an additional 50 cents off per gallon of fuel
(up to 50 gallons) by winning our monthly challenge!"**

MARCH 50/50 WINNER:

Congratulations to Jim Dunlap, of Glen Rock, PA, for submitting the first correct answer to the March 2016 50/50 Challenge question. Juancho E. Yrausquin Airport, on the Dutch Caribbean island of Saba, has the shortest runway in the world used by scheduled commercial aircraft. The airport is located on the northeast corner of the island, and features vertical cliffs off each end of the runway. WinAir operates daily flights to Saba using DHC-6 Twin Otter's. The largest plane to operate out of Saba was a DHC-7.

APRIL 50/50 QUESTION:

The flight endurance record for an aircraft was set in the 50's and stands to this day. Robert Timm and John Cook departed McCarran Field in their Cessna 172 on December 4, 1958. How many days did their record setting flight last?
