SPRING SPECIALS

Spring has sprung everyone is getting their aircraft ready for the summer flying season. Time is running out on the 2020 mandate, schedule your ADSB installation soon to avoid the last-minute rush!
Call Dawayne Wilcox for a quote today!

Avionics Exchange has several options for ADSB compliance. ADSB transponders with or without built in WAAS GPS

STRATUS ADSB TRANSPONDER

Available with or without built-in WAAS GPS.
Single engine aircraft pricing.
\$3,495 installed Without GPS
\$4,000 installed With GPS

APPAREO

Get rid of that antique autopilot and get a new digital autopilot! We are offering the TruTrak autopilot for \$5100 plus installation. Currently the STC covers Cessna 172, 175, 177 and Piper PA-28.

UAVIONIX SKYBEACON

\$1849 Plus installation!

SkyBeacon is a 2020 compliant, near zero-install, Class B1S ADS-B UAT transmitter and WAAS GPS integrated into a wing tip position light.

The power transcoder decodes replies from legacy Mode C or Mode S transponders. 14 CFR 91.227 compliant.

AVIDYNE™

Buy an IFD 540 and receive a free AXP 322 ADSB remote transponder.

The IFDs are direct replacements for popular Garmin GNS Series Navigators. In most cases, the IFDs can utilize the existing tray and connectors, and are compatible with all the popular interface configurations, which can greatly minimize installation costs
