THV RUNWAY RESURFACING UPDATE

We have been working diligently to complete Phase II of our Runway/Ramp Rehabilitation Project. It will conclude with the final apron paving, scheduled on Wednesday, June 19th. Phase III, the grooving and final painting of the runway, will begin the week of June 24th. Grooving will take place from Monday, June 24th until Friday, June 28th, from 1900 to 0700 the following morning. The runway will be NOTAM'd closed to most aircraft during these periods. A 15 minute PPR exception will also be in place, and the airport will notify those aircraft operators who will be granted permission to operate during the grooving process. Final painting of the runway is scheduled to take place on Monday, July 1st. A runway closure NOTAM, with a 15 minute PPR exception will also be issued for this work. As with the grooving operation, the airport will contact those operators who will be granted permission during the painting on 7/1. We appreciate your patience through this process and look forward to offering a smooth and well-marked runway and ramp to our tenants and visitors within the next 30 days.
